1 [Document annotation and ontology population from linguistic extractions](#)

Florence Amardeilh, Philippe Laublet, Jean-Luc Minel

October 2005 **K-CAP '05**: Proceedings of the 3rd international conference on Knowledge capture

Publisher: ACM

 Full text available: [pdf\(253.66 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In this paper, we present a workbench for semi-automatic ontology population from textual documents. It provides an environment for mapping the linguistic extractions with the domain ontology thanks to knowledge acquisition rules. Those rules are activated ...

Keywords: knowledge acquisition tool, knowledge capture for the semantic web, knowledge capture using natural language processing, knowledge extraction from text, method for ontology population, semantic web

2 [Modeling ontologies for robotic environments](#)

Antonio Chella, Massimo Cossentino, Roberto Pirrone, Andrea Ruisi

July 2002 **SEKE '02**: Proceedings of the 14th international conference on Software engineering and knowledge engineering

Publisher: ACM

 Full text available: [pdf\(203.73 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#)

On the basis of a multiple abstraction levels specification process, we developed a representational model for environmental robotic knowledge through the definition of a set of ontologies using a multi perspective approach. A general ontological model ...

Keywords: multi agent systems, ontologies, robotics

3 [Adopting ontology to facilitate knowledge sharing](#)

Theresa Edgington, Beomjin Choi, Katherine Henson, T.S. Raghu, Ajay Vinze

November 2004 **Communications of the ACM**, Volume 47 Issue 11

Publisher: ACM

 Full text available: [pdf\(118.01 KB\)](#) [html\(29.79 KB\)](#) Additional Information: [full citation](#), [abstract](#),

[references](#), [cited by](#), [index terms](#)

Ontology-enabled knowledge management experiences derived from a domain ontology development project at Intel Corporation are described and assessed.

4 [Intelligent Agents Meet Semantic Web in a Smart Meeting Room](#)

Harry Chen, Filip Perich, Dipanjan Chakraborty, Tim Finin, Anupam Joshi

July 2004 **AAMAS '04: Proceedings of the Third International Joint Conference on Autonomous Agents and Multiagent Systems - Volume 2**, Volume 2

Publisher: IEEE Computer Society

Full text available:  [pdf\(883.42 KB\)](#) Additional Information: [full citation](#), [abstract](#), [cited by](#), [index terms](#)

We describe a new smart meeting room system called EasyMeeting that explores the use of FIPA agent technologies, Semantic Web ontologies, logic reasoning, and security and privacy policies. Building on a pervasive computing system that we have developed ...

5 [Automatic learning of text-to-concept mappings exploiting WordNet-like lexical networks](#)

Dario Bonino, Fulvio Corno, Federico Pescarmona

March 2005 **SAC '05: Proceedings of the 2005 ACM symposium on Applied computing**

Publisher: ACM

Full text available:  [pdf\(82.70 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [cited by](#), [index terms](#)

A great jump towards the advent of the Semantic Web will take place when a critical mass of web resources is available for use in a semantic way. This goal can be reached by the creation of semantic meta-data in the publication workflow, or by the development ...

Keywords: WordNet, semantic indexing, semantic web, synset
